## **Attention: Community Members**

The Delta Covid-19 variant is spreading rapidly around the world. It is here in the Interior, and it will spread via vaccinated and unvaccinated people.

**If you are vaccinated**, you may not get as ill, but you can spread it to the people in the community that cannot be vaccinated for whatever reason.

**Unvaccinated** people can become very ill from the Delta variant.

**Please continue to wear a mask in public spaces to protect our elders, our children and those that are vulnerable.**
